Listen to my gospel till it is not too late

I have come in order that you might have life. It is time for you to know your true selves, to heal your wounds, to feed your hungry, and to turn your eyes to the Light. I promise you salvation and eternal Life. It is time for you to realize that we are standing at the greatest turning point in the history of humankind. At the June 2016 St. Petersburg International Economic Forum, President

Putin and President Nursultan Nazarbaev announced that Eurasian Economic Union had launched the Quantum Leap, and started building the Matrix for the remote management of biosystems, climate and geophysical processes via laser holography – the systems' management superior to Global Artificial Intellect – AI – or simply the EYE.

As of today, Russian revolutionary information-wave technology of the laser polarized holography can cure diseases, considered to be incurable, like cancer, AIDS and diabetes, even type one, and

even remotely, significantly extend lifespan and increase the quality of life. As of today, this Russian technology can control biosystems, geophysical processes and climate at a distance. As of today, this technology can provide the unlimited access to energy, resources, and food via the process of transmutation from the Quantum Vacuum. As of today, Russian Quantum Leap biotechnology can increase agricultural productivity manifold and enhance crop quality without the negative outcomes of Monsanto Genetically Modified Organisms, and even remotely. In fact,

we, Russians, can restore the Human Genome, which is ruined by Monsanto Genetically Modified Food, and purify our planet of other pollution and contamination. As of today, we, Russians, can enhance physical, intellectual and psychic abilities, and breed Superhumans.

SANCTIONS AGAINST RUSSIA HELPED RUSSIA GET RID OF OBSOLETE AND HARMFUL TECHNOLOGIES

The irony of EU and US sanctions against Russia, which EU and US directed against Russia after the legitimate national self-determination of Russians as majority of Crimea to return to the Russian Federation, lies in the fact that now Russia alongside with its partners in the Eurasian Union can openly and without a hustle rid themselves of the obsolete technologies of the Global AI with its outdated cyborgs, liquid crystal brain chips, nanobots, Voice to Skull, Iron Beam aka Death Ray, and Craig Venter's Monsanto-style genetic engineering. Iron Man with his BCI (Brain to Computer Interface) can go straight to junk yard from Darpa secret underground laboratories. The reciprocal Russian sanctions against EU and US food supply became the first step of total abandonment by Russia in July 2016 of the Monsanto GMO, as being a biological weapon of global genocide.

SORRY, NO GOD'S CHOSEN NATION

In addition, Russian advance in Quantum Genetics puts an end to Zionist claims that Ashkenazi (93% of the so-called "World Jewry") are the God's Chosen Nation of Abrahamic Jews by blood, since Ashkenazi, and especially Levites, appear to be genetically identical to Russians. Russian Quantum Genetics also puts an end to the attempts to represent British aristocracy and Royal family as Reptilians, since British Queen and her grandson William have genome identical to Russians, and British aristocracy, including Scotts, have their ancestor written down as Scythian, that is Sak-Sakolot-Sakaliba-Skolot, which designates Russian-Aryan Falcon Tribe – the Tribe of Fiery Falcon ("Sokol" or "Sakol") Ra from the country Rosh on River Ra (Volga), of which Ezekiel is speaking in the 38th chapter of the Book of Ezekiel in the Tanakh as of the country more ancient, technologically advanced and powerful than Judea.

Since the true Jews of the Tanakh / The Old Testament are members of the Negroid Tribe of Judah / Tribe of Set in the Upper Egypt (Ethiopia and North Sudan), the Zionist plans by pseudo-Jews to rebuild the Third Temple and usher in the Global Zion are illegitimate according to their own criteria. British Royal Family claims to King David's bloodline appear even less sustainable, since either British Royal Family should declare King David Russian, or British Royal Family should denounce King David's blood lineage, since British Royal Family are not

Semitic (that is, half-black-half-white).

Thus, Freemasons in the Mother Lodge in London were intending to build a Temple to a Negroid Tribe in Africa at the expense of national sovereignty. In this light, we understand British Queen's unwillingness to submit to Mr. Obama, as the one and only heir of the one and only Solomonic Dynasty of Ethiopian legacy, King Set, King of Kings, God's Elect, the Conquering Lion of the Tribe of Judah, the Venerable Father of the Three Abrahamic Religions, the Pharaoh of the Joint Russian-Aryan (Lower) and Ethiopian (Upper) Egypt, and the Benefactor of all his Tribes.

Talmudic Pseudo-Jews wanted to get a free ride into the Zionist-dominated New World Order at the expense of the Tribe of Judah, whom Zionists sterilize in Israel and to whom Zionists forbid their three-millennia old rituals of true Judaism. But, alas, the outcome was opposite to the expected. Obama, who realized his Royal blood and Royal responsibility, refused to engage in blood bath in Ukraine, that Israel does to Russia in Israeli attempt to colonize this part of Russia, called Little Russia ("Malorossia") or "Ukraine" (literally, "near the edge"). And British Queen refused to submit to Obama as highest in rank, "King of Kings and Queens", thus, dooming Zionist dreams for global domination for failure.

RUSSIA DOES NOT ACCEPT THE ROLE OF A JUNIOR PARTNER

As of today, only Russian Quantum Leap technologies hold the world from the WW3. The only impediment to the Quantum Leap we had was the Sabotage of Quantum Leap by the Satanists of the self-proclaimed Synagogue of Satan. But President Putin, declaring at the St. Petersburg International Economic Forum the strong will of Eurasian Union to head the Global Quantum Leap, this impediment is over. Russia will no longer fight for the piece of a pie at the dinner table as a junior partner, but will create a pie and slice it into equal pieces among equal partners, as our Russian-Aryan Scythian-Sak ancestors were always doing among brotherly nations at the Cossak Kon or Circle.

Therefore, we need to summarize the gruesome achievements of Satanists in their pseudo-democracy, pseudo-freedom and pseudo-equality, and close their chapter in the Human History forever.

SATANISTS DO NOT DESERVE THE ROLE OF GLOBAL GOVERNORS

Satanists do not deserve a right to create a model of global governance. Satanists make a show of technological progress, while, in reality, they overproduce and overplay toys made by slave labor. As a result, Satanists transform our planet into a junk yard of broken plastic toys, which are made fragile on purpose so that they break fast to be replaced with new fragile and senseless toys.

I call these toys senseless since these toys do not bring to humanity the real relief from suffering. On the contrary, all these toys take attention of people from real problems and real solutions. Meanwhile, the global crime rate by organized crime, first of all, state terrorism and the threat of WW3 increase exponentially, i.e., the violation of sovereignty of independent nations by the International Crime Syndicate Octopus with its Five Eyes, with its Military Base under the name of the state of Israel, and with its three hearts in the City-State of Washington, City-State of London and City-State of Vatican.

We witness the transformation of the National Security Agencies in the West into the departments and tools of the Global Organized Crime Syndicate. When we see CIA doing opium and slave trafficking, and staging terrorist attacks of pseudo-Muslims on unarmed civilians worldwide, and complying with the fake beheadings staged in studios against green screen by the Site Intel Corp as Mossad entity in Washington DC; when we see NSA violating international laws via spying on foreign citizens on their national soil; when we see Pentagon sending its troops to support the criminal state of Israel for the sake of Greater Israel from Nile to Euphrates, in violation of the 1947 UN two-state resolution on Palestine, we understand that the US is not only financially broke, it is politically and morally broke. If we transform the US into the Transatlantic Union, the same

problems remain, and these are crimes that do not allow for the statute of limitation.

Be it US, or Transatlantic Union, the pseudo-productive efforts of transnational corporations owned by the bankers of the Synagogue of Satan are identical to Sisyphus labor. Their goal is to force upon people things these people do not need, and to form obsessive-compulsive consumerist disorder on a global scale, so that people become walking and driving billboards for the so-called "brands", and senseless easily replaceable objects are produced and sold. "Brands" of Big Pharma go so far that they forcibly promote drug-addiction via poisonous drugs, which bring more evil than good, in order to make their customers into the slaves of Big Pharma.

"ECONOMIC GROWTH" OF JUNK YARD

Western governments are talking of the economic growth, i.e., of the increase of gross domestic product and productivity, as the panacea for human suffering. But, in reality, this so-called "economic growth" is the increase of gross domestic junk yard and junk yard productivity. The only way to stop this perpetuum mobile of self-destruction is to abandon the very concept of "economic growth", and make economy self-sufficient or Matrix-based, so that people do not over-produce and over-consume. The Quantum Leap technology is ready to provide a model of self-

A Victim of Agent Orange

sustaining economy, and now, decision lies within the politics, not economy for the so-called Western Democracies, while Eurasian Union has made its choice of real progress via Quantum Leap.

The so-called "economic growth" comes at a cost of Neocolonialism and slave labor, when your i-Phone is made by slaves earning 80 cents per hour in China, where everything, including food, housing and clothes cost more than in the US, and where Apple's slaves are living in concentration camps in order that Americans can play their toys. The US did not abandon slavery. It is still a country economically relying on enslavement and genocide. But will Asia and Africa submit to new slavery now, when they are doomed to become more technologically advanced than the US via joining Russia in the Quantum Leap? And can we really admire Americans for being Slave Masters? And, finally, is the role of the US as superpower even enviable?

GLOBALISM IS FASCISM

The so-called globalization is the economic fascism worse than the one offered by Hitler during WW2. And this

economic fascism comes at a cost of gradual destruction of production in the US itself, and loss of US jobs, especially jobs in technology, so that US loses technological initiative with the loss of production. It went so far that GE Capital has built its Control Center for its Industrial Sector of the Global AI in UK.

In these circumstances, the US population becomes a costly burden for the globalist oligarchs to carry. And the only way of escape the debt for the US government is to announce bankruptcy and close the shop called the American dream.

But the point is that, with the opening of the bigger and brighter shop of the Transatlantic and Transpacific Unions, the same problems remain. Even if Satanists succeed in the radical decrease of human population, the same problems would persist. Since these problems lie not in the area of economics and politics per se, and, thus, not in the size of production and population, but in the area of structural organization of the system, including planning, and, especially, in putting common good over private interest.

GLOBAL ARTIFICIAL INTELLECT WILL FAIL

Satanists are trying to resolve the issue of their inability to manage economy via their current submission to the mythic Global Artificial Intellect that should balance common good and private interest. In fact, after destroying the USSR for its advantage in productivity and technology, the so-called "Globalists" are rebuilding the USSR planned economy, but with the much worse totalitarianism and loss of individual freedom and private initiative.

But machines cannot in principle solve the problem of balancing common good and private interest. This problem lies in the area of morality, and not utility. Balancing common good and private interest is based upon the ability of a human to connect to the collective noosphere, which reveals itself through individual compassion and conscience. Compassion and conscience are the objective features of the Universal Noosphere, which is indestructible and uncreated. And one cannot teach compassion and conscience to a machine, since it is impossible to connect an artificial object, which is created, and, hence, is doomed for destruction, to something which is not created, and, hence, indestructible.

RAY KURZWEIL IS A DELUSIONAL FREAK

Ray Kurzweil who wants artificial immortality in this dimension via becoming a swarm of nanobots is a delusional freak. Google which hired a delusional freak Ray Kurzweil as its chief engineer in 2013 is a company that cannot be trusted as a Global Player. The way how Google, with its products of Facebook, Wikipedia, and Youtube and its accomplices in Microsoft and Apple, suppress any critique of crimes against humanity committed by the Nazis of the Fascist State of Israel in Palestine and Ukraine demonstrates that Google has nothing to do with freedom and democracy, and can offer nothing to the Global community. Google's executives should be prosecuted for participating in the crimes against humanity, committed by the criminal State of Israel as the military base of the Synagogue of Satan, at a new Nuremberg trial. Google technologies of global surveillance à la cyber concentration camp are totally identical to Hitler's fascism, and belong in the Zoo.
